October 9, 2025 SACI Meeting Minutes

Rep: Melissa Goodwin

- We spent the first half of the evening participating in a work session on Vision 2030. Input was solicited on strategic priorities for the next four years.
- Then we received a presentation from Dr. Ashley Cramp, Director of Student Learning on Key Instructional Updates for '25-'26.
 - More emphasis is being placed on dual enrollment at the high school level and the addition of the Uniform Certificate of General Studies (30 credit hours).
 - New math materials are being used for Kindergarten through Algebra II.
 - Artificial Intelligence is being incorporated in the new strategic plan, professional development and content.
 - Continued shifts to more authentic assessments (portfolios and projects instead of multiple choice tests).
 - Content Area Literacy - all teachers and subject areas are responsible for developing literacy.
- We concluded the evening with SACI Training - what we will be doing this year and glimpse of topics we'll cover (code of behavior, grading policy, and budget).
- Dr. McDade will be our guest speaker next month on the State of the Schools.
